

### What aspects of the TA's teaching contributed most to your learning?

Comments
mostly just interacted with Rohen, but he was great and his office hours were very helpful. Clarified any confusions I had and responded quickly to questions over email.
Rohen was AMAZING. Not only was he available outside of class, he always led very helpful office hours. His willingness to help was a privilege, and I learned so much from meeting with him.
Office hours
Office hours, responsive to emails
TA sessions before problem sets were helpful
Rohen was very helpful in office hours to understand the concepts!

Discussions of lecture material
Rohen was an incredible TA. He was always happy to help and incredibly informative. I hope he goes on to teach more in the future, perhaps as a professor!
they held office hours
office hours, rohen is great. never went to diag
Good feedback on assignments. TA office hours for the psets was very helpful.
I think the TAs in this course were very unhelpful. Grading was arbitrary (huge difference in how the TAs grade—one much more harsh than the other), they didn't really listen to you and provided poor feedback
N/A
Help in explaining the problems
Rohen Shah was very helpful in office hours explaining concepts
I loved Rohen. He was super helpful in explaining topics and asking questions. Diag was not helpful. Most questions posed to him were not really fully answered in my opinion which was super unhelpful.

### What could the TA modify to help you learn more?

Comments
N/A
Faster grading – it was good overall but felt like some assignments could take a while to hear back for
nothing.
No
I have never been in a class where a TA is not willing to give homework help. Of course, I would not expect a TA to simply give answers, but I expect them to answer basic concept questions that may be related to the homework. As a result, I felt I did not learn as much from completing homeworks as I could have.
Hold better office hours which directly answer student questions rather than generic responses, MUCH better standards for grading—this was probably the most arbitrary grading class I took, provide more feedback on assignments/ papers, more help with the final— we had NO idea what to expect!
be way more clear about grading standards – it was so arbitrary
Nothing
On the other hand, Diag could improve his teaching and his grading. He often would deduct points for unclear reasons without any explanation.
